

30 SUBS PER DAY YouTube Methods

By Boosh @ HF

First off I just want to say thanks to those that helped me find methods to write this eBook and to those that figured out methods before me that worked perfectly. I thank you all because without your help and I mean all of you, I would not be able to write these YouTube Method eBooks today!

Thanks, Boosh.

But now back to business as usual. So most of you know that there are many methods to create a good following on YouTube, may that be botting, cheating, or just subbing your way to victory using sites. In this eBook you will use one site in particular, which has helped me through getting my channel to its amount of success! Yes, it is a SUB4SUB site as well as a FRIEND4FRIEND site.

For those of you that do not know what a SUB4SUB site is, I will explain. A SUB4SUB site is a site in which it incorporates a method of linking your YouTube account to the site in which we will be using, doing so will allow you to Subscribe to users on that site. All subscriptions you make on the site we will be using show up to the users on YouTube and you will gain points. The points you gain can be offered so that when you sub to a person, your YouTube account will show

on the site so that other users may sub to you. The more points you offer, the more points other users will gain, also the more points you have will show your YouTube subscription option before other users on the site. I hope that was easy to understand, and simply FRIEND4FRIEND is when you send a friend request to a user on the site, they accept your friend request and you gain a friend on YouTube, as well as other users can send friend requests to you when they see your account on the SUB4SUB/FRIEND4FRIEND site!

Well now I hope you all understand what a SUB4SUB and FRIEND4FRIEND site is, thankfully this site that you will be using is so active that you WILL actually get REAL SUBSCRIBERS!! That's right they are REAL!!

Alright so I'll just stop talking about that junk you guys already know about now. The site we will be using is called ["http://www.subxcess.com/index.php"](http://www.subxcess.com/index.php) SubXcess is by far the best site out there to help your channel grow, trust me it helps! Below I will explain and show the way you work the site, all you have to do is follow the simple steps I show you below, I have added images to give you guys a better feel as

Below this, there's a 'YouTube Share' button and a status indicator 'I am online! Away'. The main chat area displays a list of messages with timestamps and usernames. A vertical red bar obscures the names of several users. The messages include requests for YouTube subscriptions and comments. On the right side, there's an 'ONLINE' list showing several usernames, with a red bar obscuring the names of most of them. At the bottom, there's a text box with a yellow smiley face icon and a 'Send' button.
